

UrBIOfuture

careers, education & research

Deliverable 2.1. Bio-based stakeholders completed and classified list

Acronym: **UrBIOfuture**

Project title: **‘Boosting future careers, education and research activities
in the European bio-based industry’ — ‘UrBIOfuture’**

Contract N°: **837811 — UrBIOfuture — H2020-BBI-JTI-2018**

Start date: **2019/05/01**

Duration: **12 months**

Deliverable number D2.1.

<i>Deliverable title</i>	Bio-based stakeholders completed and classified list
<i>Submission due date</i>	M1 – May 2019
<i>Actual submission date</i>	10/09/2019
<i>Work Package</i>	WP2
<i>WP Lead Beneficiary</i>	PSTP
<i>Dissemination Level</i>	Public
<i>Version</i>	00
<i>Authors</i>	Joanna Bosiacka-Kniat (PSTP), Aleix Barrera- Corominas (UAB), Dulce Tienda Martagón (UAB),.....

1. Executive Summary

Work Package 2: Interaction with the European bio-based industry, identification of its needs and validation of future programmes, has a starting point with deliverable 2.1. Bio-based stakeholders completed and classified list.

Main aims of this WP 2 are:

- Creation of a network of the European bio-based industry main actors, who seek to fulfil their lacks in professional profiles and willing to boost their interaction among educational and research institutions.
- Identify industrial competence needs in entire bio-based industries value chains; from feedstock (agriculture, forestry and fisheries) to products (e.g. chemicals, materials, and food and feed ingredients).
- Industrial validation of training programme with the bio-based industry (including industry organisations and clusters representing industries).

First task of this WP2 is: **T2.1 Establishment of a network of stakeholders in the bio-based industry sector where all participant had put an input.**

Main activities were dedicated to unlock the full potential of European bio-based industries, by contact with the Industry Expert Group (IEG) set-up by the Bio-based Industries Consortium (BIC), as the main representatives of the bio-based industry among the UrBIOfuture Working Group.

The IEG has provided the input and guided project participants towards the identification of target fields and lacks in professional profiles within the main strategic pillars of the bio-based value chains in Europe according to the SIRA of BBI from 2017:

- Biomass feedstock
- Biorefineries
- Markets, product and policies

Once the guidelines are received, a complete and detailed mapping of industrial future needs within all bio-based sectors was done after the creation of a network of stakeholders composed mainly by:

- The IEG as main representative of the European Bioeconomy sector.
- Industrial organisations (e.g. European Biomass Industry Association).
- SMEs and large enterprises of the bioeconomy sector represented in partners' own networks.
- Knowledge of the sector (socio-economic reality, policy framework, etc.).
- Behaviour of the sector with the human capital (job and promotion opportunities, required competences, etc.).

Although we still didn't sign the GA, we could be including this: his project has received funding from the Bio Based Industries Joint Undertaking (JU) under the European Union's Horizon 2020 research and innovation programme under grant agreement No 83781

BIC	Bio-based Industries Consortium
IEG	Industrial Expert Group
KETs	Key Enabling Technologies
VET	Vocational and Educational Training
WG	Working Group

Although we still didn't sign the GA, we could be including this: his project has received funding from the Bio Based Industries Joint Undertaking (JU) under the European Union's Horizon 2020 research and innovation programme under grant agreement No 83781

1. Introduction

UrBIOfuture project will contribute to support public-private concerted efforts needed between academy and industry by Boosting future careers, education and research activities in the European bio-based industry.

The present document includes Bio-based stakeholders completed and classified list and description of steps taken to complete this list by all project partners.

The list of Stakeholders presented in this document complete the current list of members of the Industrial Expert Group (IEG) and Working Group (WG) members created as part of the Task 4.1.

Type	Name	Institution	Acronim	Country	Rol in the project
European	Nelo Emerencia	BioBased Industry Consortium	BIC	Belgium	IEG Member
High School	Eva Kubátová	Secondary Medical School and College of Higher Medical Education in Ústí nad Labem.	SZSVZS	Czech Republic	WG Member
High School	Anna Pascucci	Associazione Nazionale Insegnanti Scienze Naturali (ANISM)	ANISM	Italy	WG Member
High School	Gergely Nádori	Alternatív Közgazdasági Gimnázium	AKG	Hungary	WG Member
Industry	Gerlinde van Vilsteren	WUR	WUR	The Netherlands	IEG Member
Industry	Rachel Clark	IbioIC	IbioIC	Scotland (UK)	IEG Member
Industry	Sarah Hickingbottom	BioVale	BioVale	United Kingdom	IEG Member
Industry	Katrin Kriebs	CLIB clúster	CLIB clúster	Germany	IEG Member
Public Administration	Giovanni Pauwels	Vlaamse Dienst voor Arbeidsbemiddeling en Beroepsopleiding	VDAB	Belgium	WG Member
Public Administration	Andreu Colom Cadena	Veterinarian linked to Public Administration		Spain	WG Member
Research and Technological Development	Jean-Pascal Capp	INSA – Institut National des sciences appliquées	INSA	France	WG Member
Research and Technological Development	Karin Johnson	RISE Processum AB	RISE	Sweden	WG Member
University	José Antonio Teixeira	Universidade do Minho	UdM	Portugal	WG Member

University	Dorina Nicolina Isopescu	"Gheorghe Asachi" Technical University of Iasi	TUIASI	Romania	WG Member
University	Lorenzo Morelli	Universita Cattolica de Sacro Cuore	UNICATT	Italy	IEG Member
University	Silvia Bolado	Universidad de Valladolid	UVA	Spain	IEG Member
VET	Aboulkacem Lemtiri	Agence nationale pour la formation professionnelle des adultes	AFPA	France	WG Member

VET	Patricia Costaglioli	Bordeaux INP	BINP	France	WG Member
VET	Philippe Michaud	Polytech Clermont – Ferrand	PCF	France	WG Member

2. Methodological approach

The research to be developed within the UrBIOfuture project is based on an eclectic approach with the use of complementary techniques and instruments for the search of quantitative and qualitative data.

The industry and bio-based sector involvement, boosting stakeholders' interaction: relevant stakeholders are crucial part to create the list covering whole Europe.

Completed list of European bio-based companies was the basis for sending the invitation to complete on-line survey about the needs of bio-based industry sector.

Each project partner has been assigned to a group of European countries, where this industries had to be identified.

Different channels were used to complete the list of stakeholders:

- Own partners databases and lists of contacts
- Contacts with different European clusters in each country, to identify active bio-based industries
- Own partner's search via internet browsers
- Industry Expert Group and Working Group inputs
- List of companies provided by Enterprise Europe Network

As the project aimed to cover EU28 countries, the following table and picture show how different countries have been covered by partners of the consortium (P - green), working group engaged (WG-yellow) or partners of the consortium covering these countries (PC - blue).

Countries that have been taken into account and the planned division of the partners that should contact it. It's important to note than the partners not always contacted the assigned countries, but also organisations from their networks based in different countries.

Austria	WG	Estonia	PSTP
Belgium	VITO (P)	Finland	VTT (P)
Bulgaria	ABP	France	WG
Croatia	ABP	Germany	(UAB)
Czech Republic	PSTP	Greece	FCTA
Denmark	ABP (P)	Hungary	UAB
Italy	CNR (P)	Ireland	(VITO)
Latvia	PSTP	Portugal	FCTA (PC)
Lithuania	PSTP	Romania	FCTA
Luxembourg	VITO	Slovakia	UAB
Malta	CNR(PC)	Slovenia	UAB
Netherlands	IHE (P)	Spain	FCTA (P)
Norway	VTT(PC)	Sweden	VTT
Poland	PSTP (P)	UK	VTT

Main areas of specialisation which were taken into account to identify the companies were:

Agriculture	Fishery
Beverages	Food products
Bioenergy	Forest-based industry
Biofuels	Forestry
Biorefinery	Heat (biogas and solid biomass)
Biotechnology	Maritime
Chemical	Paper and paper products
Construction materials	Pharmaceuticals
Cosmetics	Plastics
Feed	Textile and textile products
Fertilisers	Tobacco products

As for fields, priority areas for improving European industrial competitiveness in the bio-based sector have been considered as well, as the breakthrough technologies will be the ones where a skill mismatch is more likely to occur.

These are the called Key Enabling Technologies (KETs), a group of six technologies: industrial biotechnology, nanotechnology, advanced materials, micro and nanoelectronics, photonics, and advanced manufacturing technologies. They have applications in multiple industries and help tackle societal challenges. Countries and

Although we still didn't sign the GA, we could be including this: his project has received funding from the Bio Based Industries Joint Undertaking (JU) under the European Union's Horizon 2020 research and innovation programme under grant agreement No 83781

regions that fully exploit KETs will be at the forefront of creating advanced and sustainable economies.

Information which were collected by all partners concerning companies:

- Name of the company
- Company Website
- Country
- Sepecialization
- Main area of activity
- Number of employees
- E-mail address
- Phone number

Although we still didn't sign the GA, we could be including this: his project has received funding from the Bio Based Industries Joint Undertaking (JU) under the European Union's Horizon 2020 research and innovation programme under grant agreement No 83781

3. Bio-Based list of stakeholders

In total 201 companies had answer the survey and had agreed to share their data.

The highest response was received from Spain companies (78), Denmark (22), Germany (18), France (17), Belgium (14), Italy (11), Austria (10), United Kingdom (9), Poland (6) and other countries under 5 replies: Croatia, Czech Republic, Finland, Norway, Portugal, Slovenia.

Companies that had respond to the survey are mainly from sectors: biotechnology (53), pharmaceuticals (16), food products (14), agriculture (12), bioenergy (12), chemicals (10), biorafiner (9) other sectors below 8 are: biofuels, construction materials, cosmetics, feed, fertilisers, forestry, heat, peaper products, plastics, textile products.

Most of repondents are from large companies (71), micro-companies (61), small-companies (37) and medium (30).

The table below presents all the data collected from companies through the survey.

Company Name	Website	Contact e-mail	Country of Activity	Sector of Activity	Size (Number Employees)

4. Bio-Based stakeholders completed list – full list used to send the invitation to fill the survey.

The following table summarize the companies contacted in order to participate in the Survey designed to identify the Bio based industry needs.

The table presents the Name of the Company, the country where the Company is located, and, when it's available, the main area of specialization and the size of the Company according to the number of employees.

It is important to note that the partners, in collaboration with the members of the IEG contacted more than 2.050 organisations- Some of these organisations were clusters, and we contacted them in order to ask their collaboration spreading the survey through their associate companies and networks.

Name of the Company	Number of employees (< 50 / 51-100 / 101-500 / > 500)	Country	Main area of specialization
ab&cd innovations GmbH		Austria	Partners of ACIB (Austrian Centre of Industrial Research)
AbbVie GmbH		Austria	Partners of ACIB (Austrian Centre of Industrial Research)

AB Sciences	112	France	is developing protein kinase inhibitors for treatment of cancers, inflammatory disease and central nervous system diseases in both human and veterinary medicine
ABIVAX	24	France	advanced clinical stage biotech company focused on the discovery, development and commercialization of therapeutic anti-viral drugs and vaccines.
Abolis	1-10	France	Abolis aims at developing production of chemicals useful for all kind of industry using renewable resources by fermentation using modified micro-organisms.
Acobiom		France	biotechnology company specialized in the discovery of new biomarkers and the development of innovative diagnostics dedicated to personalized medicine applications.
Acticor	V	France	developing a drug for the treatment in the acute phase of ischemic stroke
ADISSEO	Large enterprise	France	Feed
Advicenne	11-50	France	late-stage biopharmaceutical company focusing on the development of paediatric friendly therapeutics for the treatment of orphan renal and neurological diseases.
Aelis Farma	3-5	France	biotech company conducting research and development on innovative signaling specific drugs
Affichem	12	France	biotech company whose mission is to design, develop and market innovative therapeutic molecules and theranostic markers for the treatment of cancer and neurodegenerative diseases.
Ahlstrom-Munksjo	>500	France	Paper
Algaia	11-50	France	seaweed-based products for use in industries such as food and cosmetics. Its latest release was sustainably-produced seaweed extracts for texturizing cosmetics.
ALGAMA	11-50	France	exploits the nutritional qualities of microalgae. Thanks to their unique nutritional value, microalgae are used for many innovative solutions in the fields of green energy and chemicals.
ALGENTECH	SME	France	Biotech
AlgoSource Group	11-50	France	recognized as one of the major microalgae world expert, offers a full range of services from production engineering to industrial scale-up of microalgae.
ALTAR	SME	France	Biotech
AmiKana BioLogistics	5-10	France	improve the clinical management of patients failing therapy by providing tools for drug resistance analysis using the yeast cell.
Anagenesis	1-10	France	preclinical-stage stem cell-based company focused on developing novel treatments for genetic and age-related muscle degenerative diseases with unmet medical needs.

Angany Genetics	5	France	develops and commercializes safe, high quality and affordable diagnostic and therapeutic products that will allow practitioners to streamline high quality diagnostic data into the design...
Antabio	11-50	France	discovery and development of first-in-class molecule compounds to treat severe infections caused by multi-drug resistant bacterial pathogens.
ApoH's technology	7	France	based on the properties of the Apolipoprotein H (ApoH) protein. This plasmatic protein has the amazing quality to capture and concentrate microorganisms in diverse samples.
Arbiom	11-50	France	is pioneering the development and commercialization of new technologies for the transformation of renewable non-food feedstock to biocompatible sugars and high-grade lignin.
ARD	95	France	mutualised private research structure, owned by major players in French agribusiness as well as regional farming cooperatives.
AtlanChim Pharma	8	France	multi-step synthesis of small molecules at lab scale, also providing stable isotope labeling & isolation, purification and synthesis of unreferenced impurities
Atlanthera	0-11	France	drug discovery company focused on bone diseases and bone cancer treatments.
Atlantic Bone Screen	9	France	non-clinical CRO providing in-vitro assays / in-vivo assays / histology services, especially in the field of bone and joint diseases and in oncology
AXENIS	9	France	introduces a variety of new solutions for academia, biotech companies and bio-pharmaceutical industry that are looking for innovative in vivo models of human biological mechanisms.
BGene Genetics	SME	France	Biotech
BIO SPRINGER		France	world leader in the yeast product market. The company provides savoury ingredients to the food and pet food industries and animal free nutrients to the biotech industries.
BIO3G L'agronome	250	France	Available in complementary ranges, our solutions are typically based on original and patented formulations, rich in bio stimulants.
BioCytex	19	France	specialized in the development of standardized flow cytometry kits in the field of Haemostasis.
BIOLIE		France	specialized in White Biotechnology and has developed a clean solvent-free enzyme-assisted aqueous extraction technology of oils and vegetal actives.
BIONEXT	1-10	France	is a dedicated to the better understanding and treatment of various diseases. The integrated platform BVS improves the effectiveness of Drug Developments and Biological Research.
BIOTECH FINE CHEMICAL	SME	France	Biotech
Cancer Campus	1-10	France	Biocluster for research and innovation focused on cancer treatment and health.
Carbios	+/-19	France	is a France-based company engaged in the research and development of new polymer recycling processes.
Carmat	490	France	provides an alternative to transplant to patients suffering from end stage heart failure.
CELENYS	12	France	development and sale of innovative hyaluronic acid based scaffolds for 3D cell culture.
Cellnovo	80-90	France	medical technology company specialising in diabetes. The company has developed and markets the first connected all-in-one diabetes management system that helps make life easier for patients

CellProthera	+/-16	France	development of innovative therapeutic solutions for the regeneration of organs damaged by disease or trauma from autologous blood peripheral stem cells.
Centre Technique du Papier (CTP)	50-500	France	Paper
Cerenis Therapeutics	16	France	the discovery, development and commercialization of novel HDL therapies for the treatment of cardiovascular and metabolic diseases.
Cisbio Bioassays	51-200	France	life sciences company with more than 30 years of experience in in vitro diagnostics and drug discovery.
Click4Tag	1-10	France	This company is specialized in detection / enumeration / rapid identification of pathogenic bacteria.
CRITT Bio-Industries	19	France	focused mainly on drug Development and consulting.
DBV	+/-240	France	Development of innovative epicutaneous treatments for food and pediatric allergies.
Defymed	3	France	develops implantable bio-artificial medical devices for diverse therapeutic applications, with a first focus on type 1 diabetes. The blockbuster product is a bio-artificial pancreas, MAILPAN
Deinove	+/-62	France	Activity based on the systematic exploration of the Deinococcus bacteria genus with exceptional biodiversity.
Diaclone	20-49	France	centre of excellence in Monoclonal Antibody and Immunoassay development.
Domain Therapeutics	18	France	strategic partner of pharmaceutical companies, aims at discovering new drug candidates targeting G-Protein Coupled Receptors (GPCRs) in all major therapeutic fields.
e[ye]BRAIN	12	France	Develops and manufactures medical devices for neurological and psychiatric diseases.
Effimune S.A	10-20	France	research and development of innovative drug candidates for transplantation and immune-mediated diseases.
ELIGO BIOSCIENCE	15	France	The synthetic biology platform, which combines CRISPR/Cas system with engineered phage capsids, enables the development of "eligobiotics": a new generation of highly precise antimicrobials
ENGIE	Large enterprise	France	Energy
ENNESYS	15	France	develops and commercializes energetically self-sufficient micro-algae-based water and organic waste recycling equipment.
Eukarÿs	4	France	develops non-viral DNA gene therapy for human liver multifactorial disorders based on its proprietary C3P3 system that generates at high-rate messenger RNA(s) in cell cytoplasm
Fermentalg	51-100	France	cleantech company that specializes in the development of a technology used to produce molecules of interest.
GamaMabs	7	France	its lead project is the monoclonal antibody (mAb) 3C23K which targets Anti-Müllerian Human Receptor II (AMHRII), an unaddressed specific target in ovarian cancer.
GamaMabs Pharma	7	France	monoclonal antibody (mAb) 3C23K which targets Anti-Müllerian Human Receptor II (AMHRII), an unaddressed specific target in ovarian cancer.
Gemacbio	10	France	immunochemistry of small molecules, commercializes poly and monoclonal antibodies and proposes therapeutic candidates by polypeptidic products.
GENE&GREEN TK	SME	France	Biotech

Gene&GreenTK	5	France	developing enzymes that degrade toxic organophosphorus compounds in insecticides and chemical warfare agents, and block communication between bacteria as an alternative to antibiotics.
Genfit	+/-150	France	biopharmaceutical company at the forefront of developing therapeutic and diagnostic solutions with a particular focus on the liver and gastroenterology.
Genomic Vision	51-200	France	molecular diagnostics company fulfilling unmet disease management needs by developing and commercializing novel life sciences research tools and molecular genetic tests.
Genopole	2.200	France	First and largest French biocluster, unites research laboratories, biotech companies, technological platforms and higher education learning programs in life sciences.
GenoScreen	30	France	develops and offers innovative products and services activities in genomics, based on sequencing and genotyping new technologies, in order t...
Genoskin	1-10	France	provides cosmetic, chemical and pharmaceutical industry with the next generation of human skin models and assays for dermatological testing
Genticel	11-50	France	develops therapeutic vaccines for women already infected by the human papillomavirus (HPV) before high grade lesions or cervical cancer occur.
Global Bioenergies	69	France	the only one in Europe to develop a process to convert renewable resources into hydrocarbons through fermentation.
Glowee	+/-11	France	biolighting system without external energy consumption. It uses the natural ability of luminescent bacteria to produce light.
Goëmar	140	France	Clean products designed for agricultural use for plant nutrition and plant protection.
Grand Luminy	6	France	facilitates the creation and establishment of businesses through the deployment of all links in the innovation chain.
GROUP CHARLOIS	SME	France	Biorefinery
HalioDx	75	France	develop and commercialize its proprietary offering in immuno-oncology with the aim to characterize the patient's peri-tumoral immune response and guide individual treatment strategies.
Hemarina	21	France	Biotechnology company developing a new generation of oxygen carrier for therapeutical and industrial applications
Histalim	30	France	histology services provider and specialist in tissue analysis, Immunohistochemistry and In Situ Hybridization for 10 years.
HORAMA	+/-20	France	Innovative gene therapy medicinal products in the field of rare ophthalmological diseases to preserve visual autonomy of the affected patients.
HTL	20	France	Development and production of biopolymers for medical and cosmetics use
Innate Pharma	194	France	biopharmaceutical company discovering and developing first-in-class therapeutic antibodies for the treatment of cancer and inflammatory diseases.
InnaVirVax	+/-13	France	cutting edge discovery in the field of therapy/prevention and prognostic of AIDS and HIV infection, other infectious diseases, and cancer therapies.
Inotrem SA	+/-4	France	biopharmaceutical company specializing in the control of the immune response during acute inflammatory diseases.
Inoviem Scientific	11-50	France	contract research biotech offering preclinical and clinical services that use cutting-edge proprietary technologies to speed up drug-development.

Institut National des Sciences Appliquées de Toulouse		France	Support letter
Integrigen	46	France	Identification of novel genetic biomarkers and the commercialization of molecular diagnostic tests for autism and oncology based on these discoveries.
Inventiva	50-200	France	biopharmaceutical company with several drug candidates at clinical and preclinical stage.
InvivoGen Therapeutics	61	France	research, development and manufacturing of gene therapy and immunotherapy products for the treatment of serious and life-threatening diseases.
Ipsen	4.900	France	biopharmaceutical company
Javenech	15	France	Manufacturing, purification and research and development of biotechnological molecules for the pharmaceutical, cosmetics and dietary market.
LALLEMAND	Large enterprise	France	Biotech
LFB	+/-2016	France	pharmaceutical group specialised in therapeutic proteins.
LibraGen	+/-20	France	development of competitive biocatalytic processes to produce valuable molecules and intermediates for the industries.
LNC Therapeutics	0-10	France	developing gut microbiota directed drugs to target obesity and associated cardiometabolic diseases.
LYSOGENE	10-20	France	is a pioneering biotechnology company in the field of gene therapy targeting severe genetic pathologies of the central nervous system in children.
MedDay	+/-100	France	treating nervous system disorders in areas of high unmet medical need through the elucidation of metabolism pathways in the brain.
Medesis Pharma	17	France	develops new treatments based on a unique nanotechnology, allowing administration of pharmacologically active metals and the extraction of toxic metals.
MedinCell	+/-100	France	delivering revolutionary medical treatments technologies to the global community, regardless of local economic conditions.
Neovacs	23	France	develops several therapeutic vaccines for the treatment of AIDS, cancer and auto-immune and allergic diseases.
Neurolix Inc.	1-10	France	early-stage biopharmaceutical company developing novel treatments for disorders of the central nervous system.
Nextbiotix	4-10	France	clinical-stage biopharmaceutical company whose mission is to harness the therapeutic potential of gut microbiota.
NORSKE SKOG	Large enterprise	France	Paper & Pulp
Nosopharm	7	France	anti-infective drug discovery. Addresses the unmet medical need of the bacterial multidrug resistance to antibiotics.
NVH Medicinal	10	France	developing genetically engineered protein-based therapies for hemostasis and regenerative medicine
Olmix Group	500-1.000	France	marine biotechnology and green chemistry.
Oncodesign	114	France	preclinical assessment of anti-cancer therapies. It's mission consists of discovering effective anti-cancer therapies.
Onxeo	69	France	conceives, develops, and registers innovative drugs for the treatment of orphan oncology diseases, an area with significant and unmet medical need.
OriBase Pharma	10	France	fully dedicated to the discovery & early development of novel & best-in-class targeted therapies from discovery to clinical validation.

Oroxcell	35	France	accredited by AFSSAPS (French Authorities) for performing regulatory toxicity studies for both pharmaceutical and cosmetic industries.
OSE Immunotherapeutics	11-50	France	an immuno-oncology company developing specific immunotherapy activating T lymphocytes, and Effimune
PAT	33	France	plant biotechnology company producing new & rare actives dedicated to cosmetic, pharmaceutical and agrochemical markets.
PathoQuest SAS	18	France	a biotech spin off of Institut Pasteur offering a game changing metagenomics approach to improving the breadth of pathogen detection
PEP-Therapy SAS	1-10	France	is a company developing targeted therapies for the treatment of severe diseases, with an initial focus on cancer.
Pharnext	40-50	France	new therapeutics that simultaneously target multiple key disease pathways for severe orphan and common neurological diseases.
Phenobio		France	Research and Development of plant extracts rich in antioxidants such as phenolic compounds for Dermocosmetic, food supplements, health and nutrition fields.
Photeomix	1-10	France	an innovative biotechnology company for the detection of differentially active components of the proteome.
PILI	13	France	brings the first renewable inks fabricated through bioproduction to replace their toxic, non-biological and non-recyclable versions
PILI	SME	France	Biotech
Poietis	19	France	biotechnology company whose mission is to support Researchers and Physicians in the emergence of personalized medicine by providing innovative solutions based on 4D Bioimprinting technolo...
Polyplus-transfection SA	42	France	biotechnology company that develops and sells innovative solutions for the delivery of nucleic acids in research, bioproduction and therapeutics.
PYLOTE	SME	France	Chemicals
RD Biotech	17	France	Production of monoclonal antibodies, recombinant antibodies, plasmid preparation, and cell production
ROQUETTE	Large enterprise	France	Biorefinery
SBM développement	Large enterprise	France	Chemicals
Sensome	10-50	France	develops a breakthrough remote monitoring technology that can turn invasive vascular medical devices into connected healthcare devices
Sensorion	14	France	The company is dedicated to the development of targeted and innovative therapies to treat diseases of the inner ear.
Sofinnova Partners	20	France	independent venture capital firm based in Paris. Over the past 40 years, the firm has financed and accompanied almost 500 companies.
Soliance	77	France	specialises in developing high added-value ingredients, derived from vegetable sources, microorganisms and microalgae.
SPYGEN	+/-12	France	service and research laboratory specialising in the monitoring of aquatic and terrestrial biodiversity using environmental DNA (eDNA)
Stallergenes	1040	France	is a biopharmaceutic company dedicated to the treatment of allergy-related respiratory diseases.
SUEZ GROUPE S.A.	Large enterprise	France	Waste/water management
SurgiMab	+/-4	France	develops antibody-based near-infrared fluorescent conjugates specific for tumors, that will allow

			surgeons to visualize sub-clinical size tumor nodules in real-time during surgery.
Tereos	24.000	France	A sugar cooperative, turns raw agricultural materials into sugar, alcohol and starch.
Theradiag	75	France	BIOTECH - offers product panels for diagnosing autoimmune diseases, allergies, and infectious diseases. Using a range of techniques, as automatic devices and solutions for high-speed diagnostics.
Theranexus	1-10	France	biopharmaceutical company that develops drug candidates to be used in the treatment of central nervous system (CNS) disorders.
THERAVECTYS	60	France	is a company specialized in the field of lentiviral vectors, developing a new generation of therapeutic vaccines & immunotherapies against cancers & infectious diseases.
Transgene	288	France	biopharmaceutical company focused on discovering and developing targeted immunotherapies for the treatment of cancer and infectious diseases.
TreeFrog Therapeutics	8	France	it has developed C-Stem, a cell encapsulation platform for 3D scalable stem cell amplification and differentiation.
Trophos	17	France	advanced clinical stage pharmaceutical company developing therapeutics from discovery to clinical validation for indications with greatly under-served needs in neurology and cardiology.
TWB	89	France	pre-industrial demonstrator which facilitates the interface between private companies and academics, offering R&D contracts from research to pilot scale (biocatalysis, synthetic biology, ferm...)
Univercell Biosolutions	1-10	France	develops next-generation homogeneous, mature, functional and differentiated human cells with physiological characteristics closely matching those of adult differentiated cells in vivo.
Vaiomer	11-50	France	focuses on interaction between the microbiome and host cells as applied to the discovery and development of novel biomarkers and therapeutic targets for cardiometabolic diseases.
Vectalys	20	France	expert in gene delivery, providing full services from expression system design to animal model creation through high quality lentiviral vectors production.
VitaDX	1-10	France	developing a solution for early diagnosis of bladder cancer
Vivet Therapeutics	2-10	France	developing innovative gene therapy treatments for orphan diseases. It's developing new AAV vectors specifically targeting the liver and generating new technologies.
WatchFrog	15	France	offers validated tests which quantify the entire range of micropollutants : endocrine disruptors, pesticides, plasticizers, pharmaceutical residues and cosmetics.
XenTech	34	France	its technology is based on one of the world's largest and best characterized collection of Patient-Derived primary tumor Xenograft models
Ynsect	+/-50	France	European company that operates in the agrofood and environmental biotech industries.
Yslab	10	France	marine biotechnology company
abc advanced biomass concepts	<50	Germany	biotechnology, energy, recycling

BioTalentum Ltd	11-50	Hungary	RTD research intensive SME, a leading technology provider in Central & Eastern Europe, working on stem cell research and services.
Egis	+/- 4000	Hungary	BIOTECH- launched the first biosimilar monoclonal antibody (infiximab) in the EU through its collaboration with Celltrion in 2013.
GenOID Molecular Biological Research, Manufacturing and Health Provider Ltd	+/-25	Hungary	
SOLVO Biotechnology	+/- 80	Hungary	BIOTECH -has been the pioneer and leader in the commercialization of membrane transporter technologies, diagnostics and drug discovery assays
TargetEx Biosciences		Hungary	BIOTECH - protein engineering and expressing gene sequences across various expression systems as well as in assay development and HT screening.
Velgene Biotechnology	1-10	Hungary	startup biotech enterprise focusing on autophagy related disorders. The company has been established to develop drug candidates for influencing autophagic activity
AVOCET BioSolutions		Ireland	provides conversion opportunities by taking feedstocks like animal manure, energy crops and Food waste to create biofertilizers and clean diesel replacements
Beacon		Ireland	Bioeconomy research center
BHSL Hydro		Ireland	provides a technology that is particularly useful for chicken farms. Through the conversion of chicken manure, heat and electricity can be produced and used on the farm to increase productivity
ClonBio Group		Ireland	Company that builds and maintains biorefineries
CMP International		Ireland	Commercial mushroom producers, a co-operative that represents most of the mushroom growers in Ireland
Enrich Environmental		Ireland	
Glanbia Ingredients		Ireland	a global nutrition group in Ireland. It is also the guiding force behind the AgriChemWhey Project, which allows for the conversion of waste from milk production into biodegradable plastics and protein powders
Greenstar		Ireland	
KelAda Pharmachem		Ireland	
Materia Nova		Ireland	Material research and development centre
Nutri-Bio		Ireland	Animal Nutrition manufacturers that provide specific feeds on a contract basis
OD Recycling		Ireland	
Premier Green Energy		Ireland	a manufacturer of waste to energy products, specifically technology that facilitates the conversion of various wastes to electricity.
Premier Green Energy Ltd		Ireland	
TEAGASC		Ireland	Agriculture and food development authority
3PLW	SME	Israel	Biotech

The Biomedical Research and Study Centre (BMC)	101-500	Latvia	Molecular biology, biomedicine, biotechnology
University of Latvia		Latvia	University
Valmiera Glass	101-500	Latvia	Manufacturing of non-metallic mineral products
Bioenergy LT, UAB	Large company	Lithuania	biochemistry, microbiology, fermentation and biosynthesis areas
Biomapas. UAB	Large company	Lithuania	life science industry
Biomė, UAB		Lithuania	biotech
BioPolis UAB	SME	Lithuania	biotech

Biorro, UAB	Large company	Lithuania	supply of advanced biotechnological products to the markets
Biotechpharma, UAB	Large company	Lithuania	end-to-end development and manufacturing services using both mammalian cell culture and microbial expression processes
Bros Farma		Lithuania	pharmaceutical
CasZyme, UAB	Start-up	Lithuania	Research in the field of CRISPR based Molecular Tools.
Droplet Genomics, UAB		Lithuania	Precision microfluidics for molecular biology
Ferentis		Lithuania	development, production and commercialisation of biomimetic peptides and peptide-based scaffolds for tissue engineering and regenerative medicine applications.
Froceth, UAB	Large company	Lithuania	medical biotechnology
IMD technologies, UAB	SME	Lithuania	biocatalysis, enzymatic technologies and biopolymers
JSC Jorinis		Lithuania	develop and distribute pharmaceutical and medicinal products
JSC Limedika		Lithuania	pharmaceutical
Laifarma	SME	Lithuania	gynecology, rheumatology, traumatology and pediatrics
LAMMC	Large company	Lithuania	conduct R&D in the fields of agronomy, forestry, as well as related fields of ecology and environmental sciences, biology, biophysics, botany and zoology.
Medicata Filia		Lithuania	manufacturing food supplements rich in natural vitamins and amino-acids, natural OTC medicines, and cosmetics.
MKDS		Lithuania	chemical
Nomads, UAB	Large company	Lithuania	life science
ProBioSanus, UAB	Large company	Lithuania	life science, healthcare
Profarma, UAB	Large company	Lithuania	biopharmaceuticals
Roquette Amilina, AB	Large company	Lithuania	produces products for Food, Paper, Industrial production and the Animal Nutrition industry.
Satimed, UAB	Large company	Lithuania	pharmaceutics
SEPTINTA		Lithuania	healthcare
Sicor Biotech, UAB	Large company	Lithuania	pharmaceutical
Thermo Fisher Scientific Baltics, UAB	Large company	Lithuania	accelerate life sciences research, solve complex analytical challenges, improve patient diagnostics, deliver medicines to market and increase laboratory productivity
UAB „LAISVA LINIJA“		Lithuania	general laboratory equipment, nanotechnology, material science, food and environmental analysis
UAB Biocentras		Lithuania	research and experiments and develops new biological products and technologies.
